

Subject : Supply Management

Workshop: Supply Chain Integration

Program overview

- 2 hours e-learning
- 2 days classroom

This workshop aims at maximizing the value delivered in the supply chain by aligning (operational / logistical) processes. A multi-disciplinary team, consisting of customers, purchasing and other stakeholders take part. Together with the facilitator, this team works side by side to formulate an action plan on bringing excellent supply chain management into practice.

Target Audience

This program is intended for:

- cross-functional teams considering integrating suppliers in their order fulfillment process and looking for a practical approach to do so.

Objectives

Through this program participants will be able to:

- identify opportunities for supplier integration;
- know how to how supplier integration in the order fulfillment process can enhance cost reduction (production and logistical costs), speed (time to market) flexibility / responsiveness, reliability and overall customer service improvement;
- know how to decide when and how to integrate the suppliers.
